

Dimantec  
Clear-Cut Solutions

## Skin Graft Mesher

USERFRIENDLY - RELIABLE - COST EFFECTIVE - LONG LIFETIME

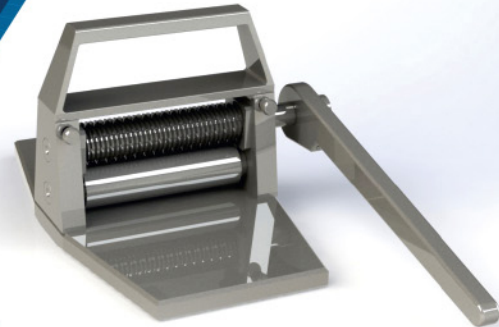

# Dimantec Skin Graft Mesher

The Dimantec Skin Graft Mesher is a long lifetime medical device with durable stainless steel construction that does not require specially shaped skin graft carriers for the different expansion ratios. Simplified design of the Dimantec Skin Graft Carrier ensures cost effective usage in the long run. Application of the ratchet handle results effortless skin grafting process.

## ADVANTAGES

- Durable stainless steel construction
- User friendly operation with smooth handle motion
- Easy to assemble and disassemble
- Simple way of changing the cutting rollers, no need for adjustment
- No need for specially shaped skin graft carriers for the different expansion ratios
- Compact case for sterilization and transportation
- Easy spare part availability
